EDUCATION

Georgia State University

Atlanta, GA

BS in Business Administration Finance

Graduation Date: December 2022

- Organizations/Awards: Vietnamese & Korean Student Associations, HOPE Scholarship recipient, Dean's List recipient

DigitalCrafts Web Development Bootcamp

Atlanta, GA

Full-Stack Web Development Certification

Graduation Date: November 2023

- Developed and managed a full-stack web application utilizing Agile methodologies and test-driven development.
- Collaborated with multiple, diverse teams of developers to build modern and functional web applications using industry-standard development tools.

SKILLS

HTML | CSS | Javascript | SQL | React | Express | Bootstrap | Git | GitHub | Node.js | PostgreSQL | Sequelize | ElephantSQL | Jira Software | Swagger | Debugging | Postman | React Bootstrap | REST API | Visual Studio Code

SOFTWARE PROJECTS

[SpotiMix](#) | [GitHub](#) | React.js | JSX | React Bootstrap | CSS

October 2023

- Build an application with smooth navigation to multiple routes using react-router-dom, enabling users to effortlessly search for any tracks, top 10 tracks of an artist, or albums through the Spotify API.
- Implemented the process of integrating a secure payment system, enhancing the application's functionality by enabling transactions and possibly expanding revenue streams.

Hackathon, City of Refuge (React.js, Sequelize, JSX, CSS)

September 2023

- Applied backend functionalities within an 8-hour sprint at City of Refuge hackathon, demonstrating proficiency in backend development, problem-solving, and rapid code deployment.
- Participated in a collaborative effort with a team of 40+ individuals, overseeing the development of a successful website, exemplifying effective teamwork and project coordination.

[Movie.tv](#) | [GitHub](#) | React.js, JSX, CSS)

September 2023

- Utilized a movie API to enable users to access detailed information about any movie.
- Expanded beyond fundamental movie details such as title, poster, and release date, by leveraging the same API key with different endpoints to fetch extended information including runtime, plot, and additional details.

[Study Buddy](#) | [GitHub](#) | Node.js, Express.js | PostgreSQL | Sequelize | CSS

September 2023

- Created a user registration and authentication system and when login, it allows the user a platform to create, manage, and study flashcards for various subjects and topics.
- Employed a fun mini Jeopardy game for users to test their knowledge in an engaging way.

[Task Quest](#) | [GitHub](#) | React.js | JSX | CSS |

September 2023

- Built a To-Do List app, enabling efficient task management with features like creation, editing, deletion, and task completion marking.
- Crafted an appealing user interface, streamlining the user's task organization experience.

[Cat-Mini](#) | [GitHub](#) | Javascript | HTML | CSS

August 2023

- Integrated Cat Breeds and Cat Facts APIs using Fetch API, delivering up-to-date cat breed details and facts for Meow Match, enhancing user experience.
- Aligned technical efforts with project goals to promote informed cat adoption decisions, showcasing diverse cat breeds with accurate, real-time information through API integration.

EXPERIENCE

UberEats, Delivery Driver

March 2021 – Present

- Maintained a 99% customer satisfaction rate by reliably executing over 1,000 deliveries within designated timeframes, demonstrating superior time management and operational efficiency. This dedication to exceeding customer expectations underscores a commitment to delivering exceptional service.
- Demonstrated effective communication and problem-solving abilities to enhance customer interactions and address concerns during deliveries, contributing to a positive overall experience.
